CONTENTS

On the sheared density interface of an entraining stratified fluid. SIAVASH NARIMOUSA and HARINDRA J. S. FERNANDO *page* 1

A numerical solution of the second-order wave-diffraction problem for a submerged cylinder of arbitrary shape. TORGEIR VADA 23

The three-dimensional hydrodynamic interaction of a finite sphere with a circular orifice at low Reynolds number. ZONG-YI YAN, SHELDON WEINBAUM, PETER GANATOS and ROBERT PFEFFER 39

An asymptotic theory for the turbulent flow over a progressive water wave. S. J. JACOBS 69

The rapid expansion of a supersonic turbulent flow: role of bulk dilatation. J. P. DUSSAUGE and J. GAVIGLIO 81

Ordered and chaotic vortex streets behind circular cylinders at low Reynolds numbers. C. W. VAN ATTA and M. GHARIB 113

Buoyancy-driven crack propagation: a mechanism for magma migration. D. A. SPENCE, P. W. SHARP and D. L. TURCOTTE 135

The scattering of light by a chaotically convecting fluid. SUSAN C. RYRIE 155

Three-dimensional instabilities of nonlinear gravity–capillary waves. JUN ZHANG and W. K. MELVILLE 187

Heat-flow experiments in liquid ^{4}He with a variable cylindrical geometry. H. GAO, G. METCALFE, T. JUNG and R. P. BEHRINGER 209

Large-scale vortex structures in turbulent wakes behind bluff bodies. Part 1. Vortex formation processes. A. E. PERRY and T. R. STEINER 233

Large-scale vortex structures in turbulent wakes behind bluff bodies. Part 2. Far-wake structures. T. R. STEINER and A. E. PERRY 271

Energy computations for evolution of class I and II instabilities of Stokes waves. MICHAEL STIASSNIE and LEV SHEMER 299

Convection in a rotating cylindrical annulus. Part 2. Transitions to asymmetric and vacillating flow. A. C. OR and F. H. BUSSE 313

A plate oscillating across a liquid interface: effects of contact-angle hysteresis. G. W. YOUNG and S. H. DAVIS 327

Nonlinear transition in three-dimensional convection. R. KESSLER 357

On the ability of drops to stick to surfaces of solids. Part 3. The influences of the motion of the surrounding fluid on dislodging drops. E. B. DUSSAN V. 381

Experimental study on the coherent structure of turbulent open-channel flow using visualization and picture processing. TADASHI UTAMI and TETSUO UENO 399

The gravitational settling of aerosol particles in homogeneous turbulence and random flow fields. M. R. MAXEY 441

Multiple solutions and flow limitation for steady flow through a collapsible tube held open at the ends. J. W. REYN 467

The influence of a peripheral layer of different viscosity on peristaltic pumping with Newtonian fluids. JAMES G. BRASSEUR, STANLEY CORRSIN and NAN Q. LU 495

Report on the First International Workshop on Water Waves and Floating Bodies. D. V. EVANS and J. N. NEWMAN 521

Timescale and structure of ejections and bursts in turbulent channel flows. T. S. LUCHIK and W. G. TIEDERMAN 529

On the spatial instability of piecewise linear free shear layers. T. F. BALSA 553
